

G90_MainUnit_FW_V1.77-Internal Beta 02.xgf Firmware Update Instructions-Update
Date: 2021.01.13

--

File: G90_MainUnit_FW_V1.77-Internal Beta 02.xgf

Note: compatible version No. ≥ 1.75 of the head firmware.
(The display part of version 1.75 and above do not need to be upgraded)

Release Notes:

1. Improved the AGC algorithm.
 - 1.1. Improved the isolation of close to channels (increased by about 30dB).
 - 1.2. Eliminated the impact noise of the speaker when switching between receiving and transmitting.
2. When connected to GSOC, all sounds in CW mode will be played by G90 speakers. If the modem function is turned on, the sound still will be played via the GSOC.

The updated version numbers are as follows:

BASE: 1.77

APP: 1.76
